Increase your financial intelligence by understanding markets Did you ever read Robert Kiyosakis book Rich Dad Poor Dad? One of the important messages in Robert Kiyosakis book is that we can increase our financial wealth by increasing our financial intelligence . He mentions that financial intelligence is made up of four technical skills - accounting, investing, understanding markets and understanding the law. The goal of this course is to learn one of those essential technical skills - understanding markets. The keys to understanding markets are to understand economic indicators such as growth, inflation, and interest rates; the impact of these indicators on financial markets; and the central banks reaction to these indicators. Get your complete guide to U.S. macroeconomic indicators in this book including historical charts We find bits and pieces of information on macroeconomic indicators all over the internet but to make the connections between these economic entities, macro-economic indicators, financial markets, and central bank policies we need a deeper insight into how they work. In any country, macroeconomic indicators are statistics released by government agencies and the private sector that provide us with information on the state of the countrys economy. This book will help you make the connections between economic indicators, financial markets and central bank policies We will make all these connections between economic entities, factors, markets and central bank policies through the use of an economic map . The economic map helps us to understand how each small sub-component aggregates to the larger components, which in turn aggregate to the Gross Domestic Product thus giving us a wider perspective of how entities interrelate with one another. The economic indicators we will study are:

This is the knowledge that investment bankers acquire during their trading experience and it is this technical skill that we will achieve by the end of this course . Market Analysis can be approached from either direction (Technicals or Fundamentals). While I believe that technical factors do lead the known fundamentals, I also believe that any important market move must be caused by underlying fundamental factors. Therefore, it simply makes sense for a technician to have some awareness of the fundamental condition of a market. - John J.
