

This book analyzes the key skills that a lawyer needs to handle a case effectively. In addition to covering skills in dealing with a client, writing legal documents, and presenting a case in court, the text demonstrates how to use law effectively, how to develop a case, and how to present persuasive arguments. The approach is practical and sets out the skills that will help to found a successful legal career. Following the Woolf reforms and other changes in procedure and evidence rules, lawyers operate in an increasingly complex environment, faced with funding litigation challenges and the usage of sophisticated communications & information technology systems.
