

# First Things First

First Things First is a revolutionary guide to managing your time by learning how to balance your life. Traditional time management suggests that working harder, smarter, and faster will help you gain control over your life, and that increased control will bring peace and fulfillment. But in the first real breakthrough in time management in years, the authors of First Things First apply the insights of The 7 Habits of Highly Effective People to our daily problems of struggling with the ever-increasing demands of work and home life. Rather than focusing on time and things, First Things First emphasizes relationships and results. And instead of efficiency, this new approach emphasizes effectiveness. It tells us why we feel a gap between how we spend our time and what's deeply important to us; how focusing on efficiency and control increases the gap instead of closing it; how to determine if what you're doing is really important, or only urgent; how to overcome the tremendous gravity of habit; how to put people ahead of schedules; and how to lead your life, not just manage your time. Offering a principle-centered approach and the wisdom and insight that made The 7 Habits of Highly Effective People a #1 best seller, First Things First empowers listeners to define what is truly important; to accomplish worthwhile goals; and to lead rich, rewarding, and balanced lives.
