

Action Guide for Emergency Management at Institutions of Higher Education

There are over 4,000 two- and four-year public and private institutions of higher education (IHEs) in the United States totaling over 15 million students and several million staff, faculty, and visitors (U.S. Department of Education, National Center for Education Statistics, Digest of Education Statistics, 2006). Each of these institutions has a commitment to ensure the safety and general welfare of those on their campuses and to provide appropriate policies, procedures, and strategies to maintain a safe campus. Because of recent violent crimes, natural disasters, and other emergencies or crises, colleges and universities are convening committees and task forces to reexamine or conduct a comprehensive review of policies, procedures, and systems related to campus safety and security. As with many critical areas on the agendas of administrators, campus safety requires building support and conducting a thorough and systematic process to produce a quality plan to prepare for and manage emergencies on campus.
