How The Rich Use Private Equity Investing To Increase Their Wealth How To Avoid Mistakes When Investing In Shares How To Communicate Value Proposition And Return On Investment How To Finance An Investment Property How To Find A Good Investment Property How To Get Started In Commercial Real Estate Investing

Example from the book: A call investment option is a financial contract including two parties, the buyer and the seller of this kind of investment option. Often it is basically labeled a call. The buyer of the option has the right but not the obligation to purchase an settled quantity of a particular commodity or financial instrument from the seller of the option at a certain time for a certain price. The seller is obligated to sell the commodity or financial instrument if the buyer should decide to purchase. For getting this right the buyer pays a premium.

As the buyer of a call investment option wants the price of the underlying instrument to rise in the future; the seller either expects that it wont, or is willing to give up a number of the upside profit from a price rise in come back for the premium plus retaining the opportunity to make a gain up to the strike price. Call investment options are most lucrative for the buyer when the underlying instrument is going up, making the price of the underlying instrument nearer to the strike price. When the prices of the underlying instrument surpass the strike price, the option is said to be in the money. The initial transaction in this situation - buying/selling a call option - is not the supplying of a physiological or financial asset - the underlying instrument. Instead its the granting of the right to purchase the underlying asset, in exchange for the investment option price or premium. Precise specifications might

differ depending on option style. A European call investment option enables the holder to exercise, to purchase, the option only on the delivery date. An American call option enables exercise at any time throughout the life of the option. Call investment options could be bought on many financial instruments apart from stock in a company. Investment Options could be bought on interest rates as well as on physiological assets like gold or crude oil. A call option should not be confused with a stock option. A stock option is the option to purchase stock in a particular company. And it is a right issued by a company to a particular person, generally an employee, to buy treasury stock. When a stock option is exercised, new shares are issued. When a call option is exercised, if it includes shares, the shares are merely being transferred from one owner to another. Nor is stock investment options traded on the open market.

Making sense of a new reality.
