

Are you a Nice Guy who keeps getting Friend Zoned? Or are you sure that the Friend Zone is only a myth? Do you wish you could date more, but cant seem to figure out how to do it?Get too nervous?Get turned down too much? Dating For F-ing Dummies is here for you.I was once a Nice Guy who thought girls were relegating me to the Friend Zone. I was clueless. I was a pathetic, awkward, virgin who didnt know how to even talk to a girl, let alone ask her out. Well, after years and years of trying, reading, learning, experimenting, and finally finding success and years of fun, I have condensed all my hard learned lessons into this book. The entire idea of this book is that I wish I could send this book back in time to 15 year old me. Of course, if my 15 year old self magically received a copy of this book, then he wouldnt have learned these lessons the hard way and thus that would create a paradox that would rip apart the space-time continuum...Oh right, dating. See, Im a nerd. I spend way too much time thinking about things like time travel. And when I applied that brain on dating, I didnt just come up with some crappy tips, I constructed an epistemological framework for understanding dating based on mathematics and some Game Theory. Dont be scared, its not that complex really, just a way of understanding dating and relationships that makes more sense than Hes just not that into you. The book begins with the framework, but then delves into dating specifics and practical advice, all while keeping the framework in mind. Aside from this framework for understanding dating and relationships, I tell the story of how I went from a friend-zoned Nice Guy who couldnt get a date to a guy that was dating multiple girls and having threesomes and just being generally awesome. I didnt write this to brag, but to show that a helpless nerdy virgin (me at

18) can become pretty good at dating, then you should be able to do the same. I wrote this because none of these lessons came to me naturally. Not one thing about dating came naturally to me, I had to figure them all out through trial-and-error. So read this book and maybe you'll save yourself some heartache and I'll be your cock-enabler. If you don't read it, you'll only be cock-blocking yourself. This book is written by a guy, mostly from the male perspective, but the framework for understanding dating applies to both sexes and even homosexual relationships and I think would be helpful for anyone to read. So if you are a female, I think this book will still be helpful for you, especially if you are a shy girl who can identify with the dating problems of shy men.
