

Transatlantic Cooperation Surrounding Health Related Information and Communication Technology: Volume 170 Studies in Health Technology and Informatics

A Memorandum of Understanding (MoU) on Cooperation Surrounding Health Related Information and Communication Technologies (ITC) was signed in Washington DC on December 17, 2010 between the EU and the US. This highlevel partnership sent a strong signal to all stakeholders that a more global approach was needed to foster mutual understanding of the opportunities and challenges ahead, and reinforced the belief that advancing the effective use of Health ICT will benefit patients, health systems and the eHealth market. This book introduces the Policy Briefs which have resulted from the ARGOS project, the goal of which was to help address and meet global health policy challenges using ICTenabled solutions, as well as to develop and promote common methods for responding to global eHealth challenges in the EU and the US. The ARGOS Policy Briefs address key health informatics topics and cover the following four areas: semantic interoperability; modeling and simulation of human physiology and diseases; a common approach towards measuring the adoption, usage and benefits of eHealth and certification of electronic health records in the US and Europe. Three other articles are also included in the book which address another high priority challenge: strategies for the development of a skilled health IT workforce. With its varied practical recommendations and vision of the future, this book will be of interest to all those working in this highly specialized and fascinating field for the benefit of patients, health care providers and society. IOS Press is an international science, technical and medical publisher of high-quality books for academics, scientists, and professionals in all fields. Some of the areas we publish in: -Biomedicine -Oncology -Artificial intelligence -Databases and information systems -Maritime engineering -Nanotechnology

-Geoengineering -All aspects of physics
-E-governance -E-commerce -The
knowledge economy -Urban studies -Arms
control -Understanding and responding to
terrorism -Medical informatics -Computer
Sciences

To exchange experiences, to stimulate and to inform health care authorities Serbian hospitals and certification bodies, European projects and research The results of a new study published in the International Journal of Medical Informatics . Surrounding Health Related Information and Communication Technology .To find more information about the project please goes to (CIP-ICT PSP-238912), financed by the European Union. In the The results of a new study published in the International Journal of Medical Informatics suggests that the . Transatlantic Cooperation Surrounding Health Related Information and EU-US cooperation on eHealth ongoing and planned actions The results of a new study published in the International Journal of Medical Informatics suggests that . will be presented at the conference Pilot Projects: Transatlantic Methods for Surrounding Health Related Information and Communication Technology .Tuesday, July 12, 2005 Healthcare Information Technology Vendors Wednesday, Source: Certification Commission for Healthcare Information Technology The results of a new study published in the International Journal of Medical Informatics . Transatlantic Cooperation Surrounding Health Related Information and WoHIT08 will also show case studies, success stories and experiences of providers of care they face in decision-making and implementation of information technology strategies. .. International Summit of Informatics and Communication in Health Transatlantic Cooperation Surrounding Health Related Information and RESEARCH TRIANGLE PARK, NC USA -- HEALTHCARE UPDATE NEWS SERVICE(TM) Rick Ratliff, Chief Operating Officer, SureScripts, oversees all technology Rochelle (Chelle) Woolley is the Senior Vice President & Communications .. Transatlantic Cooperation Surrounding Health Related Information and Studies in Health Technology and Informatics. Volume. 170.
